GEORGE PUSTOVIT

Full-stack developer

About me

I am a third-generation developer (that's right, even my grandma used to code) with a degree in Computer Science and a deep passion for programming. I enjoy solving real-world business problems through code and, especially, I love to create the things that live on the web.

As a full-stack developer, I'm comfortable handling every part of the development cycle. Over the years, I've gained a wide range of experience, as well as aa solid understanding of what businesses truly need from developers. I'm always eager to bring my knowledge and skills alongs to new projects.
