GEORGE PUSTOVIT

Full stack developer

About me

I am a third generation developer (yep, even my grandma used to code) from Ukraine with a bachelor degree in computer science who is passionate about his job. I enjoy solving business problems with the help of programming and, especially, I love to create things that live on the web. For the years spent in this field I had all sorts of experiences, so I have a solid understanding what the business needs from programmers, and will be happy to apply my skills and knowledge in your projects.
